

Secure Telehealth connects doctors with patients under supervision at remote locations

About

Secure Telehealth is a Pittsburgh-based company that provides secure online services to the behavioral health community. The service is used by physicians to remotely connect with patients who are under supervision at dispersed locations. Secure Telehealth benefits its customers by making the country's best physicians in their respective fields available to any patient regardless of their location – all via secure web conferencing.

The Need

Secure Telehealth supports doctor/patient locations that may be thousands of miles apart in certain cases. In order to best serve their customers, Secure Telehealth needed a web conferencing solution with a strong focus on security and ease of implementation. High quality video and audio were also crucial to successfully perform psychiatric evaluations, medical checks and other procedures conducted remotely.

Secure Telehealth and OmniJoin[®]

Being that security was a driving factor for Secure Telehealth's decision, the OmniJoin platform had a lot to offer. Industry standard TLS encryption, end-to-end for all conference data, including any live sharing, VoIP and multi-party video ensured that every OmniJoin activity is well protected. In addition, OmniJoin web conferencing provides proxy and firewall traversal for conferencing among participants located at hospitals and large practices where proxy servers are prevalent. Getting started with OmniJoin web conferencing is

“Telepsychiatry is an effective way to provide access to psychiatric care for individuals living in underserved areas. It has become one of the most successful of all the telemedicine applications because its practitioners don’t need to touch their patients to treat them. We have found web-based video conferencing to be an effective service-delivery method.”

Jim Mountain, Secure Telehealth President

simple and straightforward – the only requirements are a broadband internet connection, laptop, web browser and web cam. Inviting patients and colleagues to OmniJoin web meetings is as easy as sharing a URL and participants receive HD quality web conferencing and collaboration tools that can greatly enhance their healthcare experience.
