

Public Cloud vs. Private Cloud

One cloud-based service.

Two deployment models.

NO special hardware.

OmniJoin® web conferencing from Brother delivers high-quality, highly-secure voice, video and collaboration through web meetings, in our public cloud or your own private cloud. www.omnijoin.com.

Brother International Corporation is one of the premier providers of products for the home, home office and office.

OmniJoin® web and video conferencing provides the meeting experience that businesses truly need to meet smarter – boardroom-quality, multi-party video, combined with smoothly synched audio. Meet online to see your colleagues clearly, share and mark-up files, and play video files virtually instantly, all with surprisingly simple desktop controls.

With two deployment models, you can choose what is best for your business. Our public cloud offers varying levels of service, and the ability to quickly scale as your business needs grow. Our private cloud can be installed behind your firewall, requires no special hardware, and gives you the utmost control in security, compliance and performance.
