

OmniJoin for Telehealth

OmniJoin web conferencing from Brother delivers high quality, highly secure voice, video and collaboration through web meetings, in our public cloud or your own private cloud.

Brother International Corporation is one of the premier providers of products for the home, home office and office.

Helping Patients and Providers Personally Connect in a Comfortable, Secure Online Setting

OmniJoin web & video conferencing is being used by many healthcare institutions to support telehealth initiatives. Telehealth is becoming prevalent as it's a solution to many of the classic healthcare challenges: remote access to care, cost effective delivery and distribution of limited providers.

OmniJoin supports telehealth by providing an intimate and interactive web & video conferencing service, allowing patients and healthcare providers to personally connect in a comfortable, secure online setting to raise the bar on convenient, patient-centered care. OmniJoin's web & video conferencing enhances the overall healthcare experience for both the patient and medical professional.

Some Common Telehealth Uses of OmniJoin:

OmniJoin helps its customers create a HIPAA compliant video conferencing solution that can be used to support many telehealth initiatives. Some include:

- **Behavioral Telehealth** - the delivery of remote and secure psychiatric assessment and care through video conferencing technology
- **Telehomecare** - providing quality care directly to a patient's home through the use of web and video conferencing
- **Tele-education** - cost-effective remote training and learning conducted for doctors, nurses and other healthcare professionals
- **Telemedicine** - the use of web and video conferencing technologies in order to provide clinical health care or primary care at a distance, helping you to be compliant with HIPAA standards and security requirements

Why OmniJoin for Healthcare?

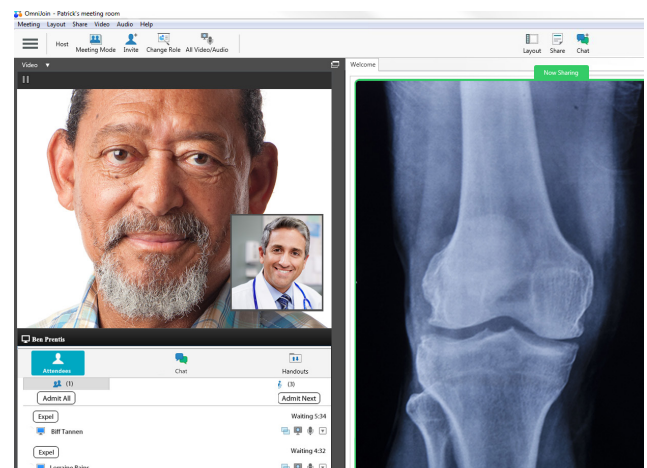

The suite of powerful features offered in OmniJoin are being utilized by many healthcare institutions.

- **Granular Admin Controls** - IT can customize the host and attendee permissions to ensure document sharing, recording and storage follow your strict compliance guidelines.
- **Highly Secure** - Our service was designed for the security conscious, taking into account IT policy compliance, multi-office networks and HIPAA standards.
- **HD Video** - When it is a requirement to see your patients, OmniJoin Intelligent HD Video makes it feel like a 'face-to-face' meeting simulating the close and personal experience you would get in person.
- **Application, desktop and document sharing** - We offer a large suite of collaboration tools to facilitate case reviews and medical record sharing. In addition, robust annotation tools/whiteboard options can further help enrich your interaction.
- **On-premise & cloud options** - You can choose which deployment model, public cloud or your own private cloud that fits your security standards and needs.

OmniJoin Waiting Room

The OmniJoin Waiting Room feature is an extension of your practice. Your patients can enter your 'virtual' Waiting Room via a comfortable online setting that helps you maintain your high quality of care and serve more people.

- Brand your Waiting Room with a graphic and custom message
- Patients are queued in the order in which they enter
- Admit or expel patients with one click

Waiting Room

It's that easy. Walk-ins welcome!
