

Simplified Patient Layout

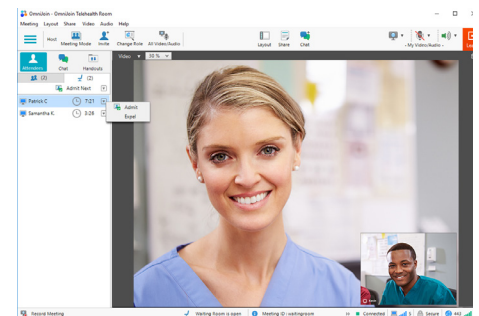

OmniJoin web conferencing from Brother

delivers high quality, highly secure voice, video and collaboration through web meetings, in our public cloud or your own private cloud.

The OmniJoin simplified patient layout allows you to expose only the most basic controls to patients when meeting with a doctor. By limiting the features they are able to see, you eliminate any confusion by the patient, allowing them to only focus on their interaction with the doctor.

- Limit what a patient can do in a meeting, exposing only a simple tool ribbon and status bar
- Easier and faster meeting process with less button clicking
- Fewer visual distractions for the patient
- Doctor maintains complete control of the meeting

Host view, maintain complete control of the meeting

OmniJoin for Healthcare

HIPAA compliant video conferencing is fast becoming a must-have technology for healthcare providers looking to expand their reach. Large healthcare institutions and solo practitioners alike are utilizing the OmniJoin cloud-based telemedicine solution to grow their telehealth practices and personally connect with patients from virtually anywhere.

- Advanced security, meets the HIPAA requirements
- Easy to host and join appointments from anywhere with our mobile apps
- Transmit, share and annotate patient charts, RXs, and x-rays
- Integrate our solution into other Healthcare systems for added customization

Brother International Corporation is one of the premier providers of products for the home, home office and office.
