

Skype for Business & OmniJoin

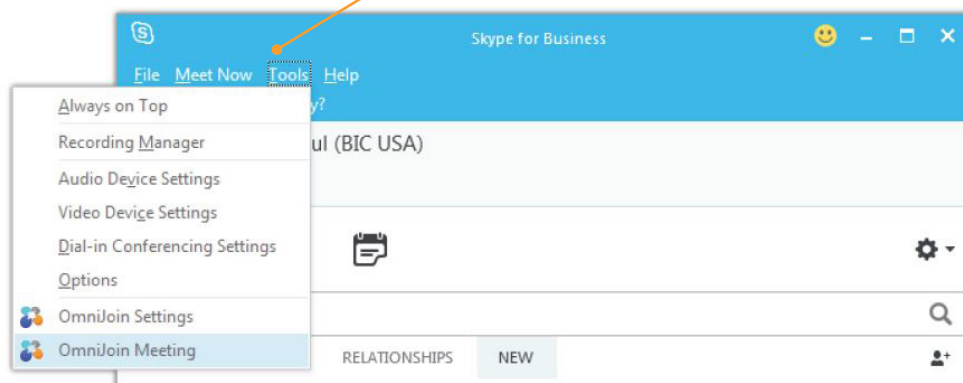

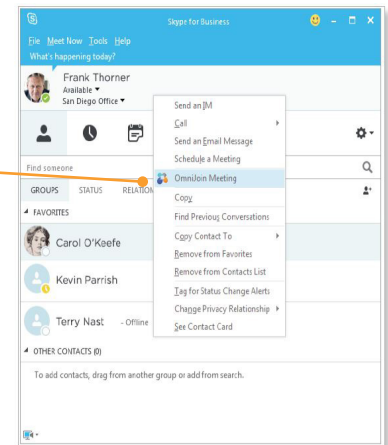

OmniJoin[®] web conferencing from Brother delivers high quality, highly secure voice, video and collaboration through web meetings, in our public cloud or your own private cloud.

Use the OmniJoin Plug-in for Skype™ for Business to enhance your Skype for Business experience

After installing the OmniJoin plug-in you can quickly start a meeting, or manage your Skype for Business connection settings, from the Skype for Business interface. With this plug-in, there is no need to leave your instant messaging system when you want to meet or collaborate with your contacts. Just send the invite via chat & begin meeting!

Right-click on a contact and you'll see an addition to this menu too. Easily invite the selected person to meet via OmniJoin!

Your new OmniJoin-enhanced Skype for Business interface features two new items under the “tools” menu. You can change your OmniJoin default Skype for Business settings from here, as well as launching your own default meeting room.

Brother International Corporation is one of the premier providers of products for the home, home office and office.
